# Growth in TIST: Is your Cluster and Small Group Growing?

TIST Kenya has been expanding rapidly reaching new areas. In the last four years (since 2013), TIST has expanded to Machakos, Nyamira, Trans-nzoia, Murang'a counties and recently to Makueni and Taita Taveta, counties.

Working with a UK based law firm, Freshfields, TIST has established several Clusters. In Machakos, we are in Yatta. Currently, there are four (4) Clusters already formed, namely: Kakumini TIST Cluster, Kaluluini TIST Cluster, Mamba TIST Cluster and Ndalani TIST Cluster. In Nyamira, we have Ekerenyo TIST Cluster, Etono TIST Cluster, Gesura TIST Cluster, Kabirigo TIST Cluster, Matorola TIST Cluster, Ratera TIST Cluster, Sungoiga TIST Cluster and Riakimai TIST Cluster. In Trans-Nzoia, we have Kesogoni TIST Cluster, Munyaka TIST Cluster and Kapsara TIST Cluster.

Through partnership with Taylors of Harrogate, an international tea and coffee buying company, we are working with tea farmers from 4 KTDA Tea Factories: Ngere and Makomboki in Murang'a County, as well as Kionyo and Imenti in Meru County.

TIST Vision is to empower Small Groups members to reverse the devastating effects of deforestation, drought, and famine through identifying local sustainable development goals that include tree planting, sustainable agriculture, health education and nutrition. TIST also strives to provide long-term revenue for the Small Group participants through the sale of greenhouse gas credits (GhG).

The individual growth of a Small Group is paramount. It is the desire of TIST to see each individual member of a Small Group reaps the TIST benefits that help raise their livelihoods and income. Through tree planting, a number of TIST farmers have reported to have earned more income or made household savings through selling of seedlings, fruits, firewood, fodder for livestock, honey, increased soil fertility and biodiversity plus improved water level in our streams. In practicing Conservation Farming, a significant number of farmers have witnessed increased crop harvest, more soil fertility, reduced soil erosion, less farm labour among other benefits. Health and nutrition education has helped many household take preventive measures against diseases and nutritional deficiency issues. Further, through TIST energy saving jiko, many families have made significant savings in wood fuel as well as in reducing indoor smoke pollution.

## Growth in your Small Group?

Your Small Group should now sit down and evaluate its growth since joining TIST. How many trees have you planted? How many of those trees are fruit and indigenous? How many farmers in your group have practiced Conservation Farming? How were the results in comparison with conventional farming? How many members have TIST clean and energy saving jiko? Have any of your group members done a raised seed-bed? How are the results? What goals do you have for this coming rainy

season? What actions could you take that would provide big benefits to your Group members? How many additional trees are you going to plant? How many plots of CF are you preparing? How many raised-seeds and seedlings do you require for this coming rainy season and the next? What other goals do you have?

Remember, for a Small Group to be profitable for its members, it should plant more than 5,000 trees within the first five years of joining TIST. Most TIST Small Groups have not achieved this goal, but many have.

Please prepare your Small Group report and present to other groups in your next Cluster meeting. Ask for help and ideas from other Small Groups to improve your **Action Plan for growth with goals (Conditions of Satisfactions - COS)**

#### Growth in your Cluster?

At your Cluster meeting, please evaluate your growth as well. How many trees does your Cluster have? How many Small Groups have been registered? How many additional trees have been planted each year? How many CF plots have been done this and last season? How many farmers are

doing CF, honey, riparian, fruit trees, stoves, raised-seed beds?

What are your goals for this year? How many additional trees, CF, Energy saving stoves, raised-seed beds, fruit and indigenous trees? What other goals do you have?

In Quantification, how many of your Small Groups have been quantified in the last 18 months? What are your plans to get every Small Group quantified within 18 months period?

In Small Group payments, how many groups have received tree incentives? How many are qualifying for trees incentives having achieved more than 500 trees, have signed the GhG contract agreement form and have been quantified in the last 18 months? How many are not qualifying? What are the reasons for not qualifying? How are you going to help or encourage those not qualifying? What are your Conditions of Satisfactions / goals in Small Group payments?

Cluster leaders are requested to work with your Cluster Servant to prepare a report and an **Action Plan for growth with goals (Conditions of Satisfactions - COS)** and present it in the next Cluster meeting and send it to the GOCC and the Leadership Council.

## Help Wanted. Leadership Council Support Person.

TIST Kenya Leadership Council is looking for a qualified person to support the LC Team in note taking, report writing, marketing proposal writing and any other duty that LC may instruct.

If you have a passion for working with rural farmers, improving the environment and are computer literate with good knowledge of

internet, emails; well spoken and written in English; a Team player and good in note taking, reports writing, marketing proposals writing, please send your application letter accompanied by your curriculum vitae to Eunice Wambui via email eunicewambui@tist.org not later than 30<sup>th</sup> April 2017.

## TIST: Why your Small Group should have more than 500 trees to qualify for payments.

**M**any Small Groups have been asking why they don't get tree incentives when their trees are less than 500.

To begin with, tree incentives are pre-payments for sale of carbon credits. It's a business. In business, people work hard to get profits. Like in all businesses, to get profit, costs or expenses must be kept low, and sales high.

When a Small Group has so few trees, the cost of quantification/ per tree goes up. The cost of paying such a group also is high. Importantly, the cost of validation, verification per tonne of carbon is also very high. Therefore, no profit can be made when the costs are high. We get a loss.

In order to stay profitable in TIST and therefore earn good income for yourself and your Small Group, you should ensure your Small Group plants additional trees each planting season. TIST policy has recommended 5,000 trees as a reasonable number to get your Small Group to profitable levels in terms of carbon income and other trees benefits.

Some Small Groups decry high tree

mortality as reason for not having many trees. TIST farmers have identified, tested and proved that a raised seed bed helps significantly in helping your seedlings survival once you plant in your farm. Please discuss this tree nursery technique at your next Small Group weekly or Bi-weekly meeting as well as in your Cluster meeting and learn more ideas.

## Kiriogo TIST Cluster: We are happy to receive Payments.

**W**e, TIST Kiriogo Cluster are happy to receive tree incentives. Kiriogo Cluster is in Laikipia region. We joined TIST in 2008 through the TIST Social Entrepreneurship (TSE) effort led by Jinarris Gachoya.

In our last tree payments, twenty two (22) Small Groups received their payments.

**Members of Kiriogo TIST Cluster displaying their tree payment vouchers during their Cluster meeting**

# TIST Kenya Receive Visitors from Taylors of Harrogate, KTDA, and Natural Capital Partners.

**O**n March 6 and 7, 2017, TIST Kenya was glad to receive visitors from Taylors of Harrogate, KTDA and Natural Capital Partners. Taylors and NCP are working in collaboration with TIST and Tea Farmers in selected Tea factories in helping the farmers earn more income through sale of carbon tonnes as well as improving their livelihoods. KTDA is an important stakeholder in this effort. Tea areas targeted and already doing TIST activities are Kionyo and Imenti Tea Factories in Meru County and Makomboki and Ngere Tea Factories in Murang'a.

The visit included from Taylors Tea: Andy Brown, Managing Director of Taylors Tea, Mary Godfrey and Paul Cogan of the collaborative CEO team, Henry Boocock, a tea buyer and Joanne Gray who supports the collaborative CEO team. Mr Kithae Njeru, head of the KTDA Foundation, joined the group. Simon Brown, Managing Director, Natural Capital Partners joined the TIST team of Ben & Vannessa Henneke, Patricia Wachuka and Kimani Mwangi. Eunice Wambui, Dorothy Naitore and Jeniffer Kithure of the Leadership Council joined the meetings on the second day of the visit.

On first day of the visit, 6th March, the team met at Makomboki Tea Factory and had brief

introductions lead by Factory Unit Manager and the Vice Chairman of the factory. Later, the team proceeding for farm visits. The team visited a TIST grove in Kairitu area where a new TIST Farmer has planted new avocado trees totaling 126.

The team later attended Gataini TIST Cluster meeting. Seventy two (72) new TIST members or people interested in joining TIST were in attendance. The visitors got a chance to interact freely with the farmers, and participate in TIST trainings at the Cluster meeting.

They also visited a TIST farmer who has already built a raised tree nursery and a Conservation Farming (CF) plot, and later they visited a farmer in Kanderendu area who has done 9 horticultural crops, supported by a water project funded by Taylors. Other areas visited were Kanderendu secondary school and a TIST grove with 16 bee hives and a raised tree nursery.

The second day of the visit involved a visit to Ngere Tea Factory. At the Factory, the visitors were taken through tea processing units/stages. Later, there were meetings in Factory premises when TIST did a presentation. A luncheon meeting allowed a very productive exchange of ideas between the members of the Taylors Collaborative CEOs and the TIST Leadership Council members.

## Hygiene & Sanitation: Hand washing.

**H**and washing with soap is among the most effective and inexpensive ways to prevent diarrheal diseases and pneumonia, which together are responsible for the many child deaths in Kenya.

Hands often act as vectors that carry disease-causing pathogens from person to person, either through direct contact or indirectly via surfaces. Humans can spread bacteria by touching other people's hand, hair, nose, and face. Hands that have been in contact with human or animal feces, bodily fluids like nasal excretions, and contaminated foods or water can transport bacteria, viruses and parasites to unwitting hosts. Hand washing with soap works by interrupting the transmission of disease.

Washing hands with water alone is significantly less effective than washing hands with soap in terms of removing germs. Effective hand-washing with soap takes 8 - 15 seconds, followed by thorough rinsing with running water.

### Critical times in hand washing with soap

Here are some critical times to clean your hands:

1. Before and after meals and snacks
2. Before caring for young children
3. After touching a public surface.
4. Before and after preparing food, especially raw meat, poultry, or seafood
5. After using the restroom
6. When hands are dirty
7. After touching animals
8. When you or someone around you is ill

### Awareness of hand washing with soap

Hand washing is likely to be especially important where people congregate (schools,

offices, church, meetings), where ill or vulnerable people are concentrated (hospitals, nursing homes), where food is prepared and shared and in homes, especially where there are young children and vulnerable adults.

### ***A simple facility for washing hands after visiting toilet***

The simplest facility is just to have a small jerry can filled with water placed outside latrines. Soap should also be provided.

However, this method is not ideal as people have to touch the jerry can before and after washing their hands which can still spread germs. An alternative hand-washing facility can be made like this:

1. Make a simple wooden frame with a nail in the middle for a peg.
2. Make a soak pit for the waste water by digging a hole around the frame and filling it with stones. This will let the waste water drain away into the soil.
3. Get one big open container (a barrel or cut-open jerry-can) and fill it with water.
4. Find a smaller open container, like a cut-open water bottle.
5. Make a small hole in the bottom of this container and fix a handle to it.
6. Dip the small container into the larger one to fill it with water.
7. Hang the small container on the peg so that the water starts to drip through the hole like a tap.
8. Wash your hands with soap.

The advantage of this system is that you only touch the small container once to fill it with water.

# Ukuaji katika TIST: Je, Cluster yako na Kikundi chako kidogo kinakua?

TIST Kenya imekuwa ikipanuka haraka kufikia maeneo mapya. Katika muda wa miaka minne iliyopita (tangu 2013), TIST imeenea hadi kaunti za Machakos, Nyamira, Trans-Nzoia, Murang'a na hivi karibuni itakuwa katika kaunti za Makueni na Taita Taveta.

Kwa kufanya kazi na kampuni ya kisheria ya Freshfields iliyo nchini Uingereza, TIST imeweza kuvianzisha imeanzisha Cluster kadhaa. Katika Machakos, sisi tuko Yatta. Hivi sasa, kuna Cluster nne (4) tayari zilizoundwa ambazo ni: Kakumini TIST Cluster, Kaluluini Cluster TIST, Mamba Cluster TIST na Ndalani Cluster TIST. Katika Nyamira, tuna Ekerenyo TIST Cluster, Etono Cluster TIST, Gesura Cluster TIST, Kabirigo Cluster TIST, Matorola Cluster TIST, Ratera Cluster TIST, Sungoiga Cluster TIST na Riakimai Cluster TIST. Katika Trans-Nzoia, Tuna Kesogoni TIST Cluster, Munyaka Cluster TIST na Kapsara Cluster TIST.

Kwa ushirikiano na Taylors of Harrogate, campuni ya kimataifa ya kununua chai na kahawa, tunafanya kazi na wakulima wa chai kutoka viwanda vinne vya chai vya KTDA, ambazo ni: Ngere na Makomboki ndani ya kaunti ya Murang'a, pamoja na Kionyo na Imenti katika kaunti ya Meru.

Maono ya TIST ni ya kuwawezesha wanachama wa vikundi vidogo kubadilisha madhara ya ukataji wa miti, ukame, na njaa kwa kutambua malengo ya visingi vya maendeleo endelevu ambayo ni pamoja na kupanda miti, kilimo endelevu, elimu ya afya na lishe. TIST pia inajitahidi kutoa mapato ya muda mrefu kwa ajili ya washiriki wa vikundi vidogo kuitia mauzo ya mikopo gesi chafu (*Greenhouse Gas credits (GHG)*).

Ukuaji binafisi wa vikundi vidogo una muhimu mkubwa. Ni hamu ya TIST kuona kila mmoja wa wanachama wa vikundi vidogo wakivuna faida za TIST ili kusaidia kuongeza maisha yao pamoja na mapato yao. Kwa kupanda miti, idadi kubwa ya wakulima wa TIST wametuarifu kuwa wameyapata mapato zaidi au waliweka akiba nyumbani kwa njia ya kuuza miche, matunda, kuni, chakula cha mifugo, asali, kuongeza rutuba ya udongo na viumbe hai pamoja na kuboresha viwango vya maji katika mito yetu. Katika mazoezi ya utunzaji wa shamba, idadi kubwa ya wakulima imeshuhudia kuongezeka kwa mavuno ya mazao, uzazi zaidi wa udongo, mmomonyoko wa udongo kupunguzwa, kazi shambani kupunguzika pamoja na faida nyingine. Afya na lishe elimu imesaidia wengi nyumbani kuchukua hatua za kujizuia dhidi ya magonjwa na masuala ya lishe pungufu. Zaidi ya hayo, kuitia jiko la TIST la kuhifadhi nishati, familia nyingi zimeweza kufanya akiba kubwa kwa kuni na pia katika kupunguza uchafuzi wa mazingira kuitia moshi.

## Je, kuna ukuajai katika kikundi chako kidogo?

Vikundi vyenu vidogo sasa lazima viketi chini na kutathmini ukuaji wake tangu kuijunga na TIST. Je, ni miti mingapi imepandwa? Je, katika miti hiyo, mingapi ni ya matunda na asilia? Ni wakulima wangapi katika kikundi chenu wanafanya mazoezi na kilimo hai? Matokeo yalikuwa vipi yakilinganishwa na yakilimo cha kawaida? Ni wanachama wwangapi wana jiko la kuhifadhi nishati la TIST? Je, kuna mwanachamayeyote wa kikundi chako ambaye amejaribu kukulia mbegu-kitanda? Matokeo ni ya aina gani?

Mna malengo yepi ya msimu huu wa mvua unaokuja? Ni hatua gani ambazo zinaweza kuchukuliwa kutoa faida kwa wanachama wa kikundi chako? Mnaenda kupanda miti ngapi ya ziada? Mmeandaa viwanja vingapi vya CF? Ni mbegu ngapi za kukulia na miche zinahitajika katika msimi ujao wa mvua na utakaofuata? Mna malengo mengine gani?

Kumbuka, ili kikundi kidog cha TIST kiwe na faida kwa wanachama wake, ni lazima wapande miti zaidi ya 5,000 ndani ya miaka mitano ya kwanza ya kujiunga na TIST. Vikundi vingi vya TIST havijaweza kufanikia lengo hili, lakini wengi wameweza.

Tafadhali andaa taarifa yako ya kikundi kidogo ili uweze kuiwasilisha kwa vikundi vingine katika mkutano ujao wa Cluster. Unaweza kuomba msaada na mawazo kutoka kwa vikundi vingine vidogo ili kuboresha mpango wako kwa ajili ya ukuaji wa uchumi na malengo (Masharti ya Kuridhisha – **(Conditions of Satisfactions (COS))**.

### Kuna ukuaji wowote katika Cluster?

Katika mkutano wako wa Cluster, tafadhali tathmini ukuaji wako pia. Cluste yako ina miti mingapi? Ni vikundi vingapi vidogo vilivyoandikishwa? Ni miti mingapi ya ziada iliypandwa kila mwaka? Ni viwanja vingapi vya CF vimefanyika katika huu msimu na uliopita? Ni

wakulima wangapi wanafanya CF, asali, kandokando ya mto, miti ya matunda, majiko, vitanda vya kukulia mbegu?

Malengo yako kwa mwaka huu ni yepi? Ni miti mingapi ya ziada, CF, majiko sanifu ya kuhifadhi nishati, vitanda ya kukulia mbegu, matunda na miti ya asili? Una malengo gani mengine?

Katika upimaji, ni idadi ipi ya vikundi vidogo vilivyoandikishwa katika miezi 18 iliyopita? Una mipango ipi ili kuhakikisha kwamba vikundi vyote vidogo vimekaguliwa ndani ya kipindi cha miezi 18? Katika malipo ya vikundi vidogo, ni vikundi vingapi ambavyo vimepokea motisha ya miti? Ni vikundi vingapi ambavyo vimefuzu kupata motisha ya miti kwa kuwa na miti zaidi ya mia tano (500), vimetia saini fomu ya mkataba wa maelewano wa GhG na vimekaguliwa katika miezi kumi na nane (18) iliyopita? Ni vikundi vingapi ambavyo havijafuzu? Sababu za kutofuzu ni zipi? Wewe utawasaidiaje na kuwatia moyo waliokosa kufuzu? Je masharti ya kuridhika kwako ni yepi? Malengo ya malipo katika kikundi kidogo ni yepi?

Viongozi wa cluster wanaombwa kufanya kazi na watumishi wao ili kuandaa ripoti na Mpango Kazi kwa ajili ya ukuaji na malengo (Masharti ya Kuridhisha – (Conditions of Satisfactions (COS)) na waziwasilishe katika mkutano ujao wa Cluster na pia waitume kwa GOCC na Baraza la Uongozi.

## Msaada Unatakikana. Msaidizi wa Uongozi wa Baraza.

**B**araza la Uongozi la TIST Kenya linatafuta mtu baliyehitimkuipatia timu ya Uongozi wa Baraza msaada katika kuandika kumbukumbu, kuandika ripoti, kuandika mapendekezo ya masoko na wajibu wowote ambao Uongozi wa Baraza utahitaji.

Kama una shauku ya kufanya kazi na wakulima vijijini, kuboresha mazingira na una uwezo wa kutumia kompyuta ukiwa na ujuzi wa mtandao,

barua pepe, kusoma na kuandika kwa lugha ya Kiingereza, unaweza fanya kazi katika kikundi na unaweza kuandika kumbukumbu, kuandika ripoti, kuandika mapendekezo ya masoko, tafadhali tuma maombi yako kwa barua ukifuatana na mtaala vitae wako kuititia baruapepe kwa Eunice Wambui, eunicewambui@tist.org, muda usiozidi tarehe 30 Aprili 2017.

# TIST: Kwa nini kikundi chako kidogo kinapaswa kuwa na miti Zaidi ya 500 ili kuhitimu kuyapata malipo?

**T**IST: Kwa nini wanakikundi wanapaswa kuwa miti zaidi ya 500 kuhitimu kwa ajili ya malipo

Vikundi vingi vidogo vimeduwa vikiuiza ni kwa nini hawapati motisha ya mti wakati miti yao ni chini ya mia tano (500).

Kwa kuanzia, motisha ya mti ni malipo ya kabla kwa ajili ya mauzo ya kadi za kaboni. Ni biashara. Katika biashara, watu hufanya kazi kwa bidii ili kupata faida. Kama katika biashara zote, kupata faida, gharama lazima iwekwe chini, na mauzo yawe ni ya juu.

Wakati kikundi kidogo kinamiti michache, gharama ya upimaji / kwa mti huenda juu. Gharama ya kulipa kama kikundi pia ni ya juu. Muhimu sana, gharama ya uthibitisho, uthibitisho kwa tani ya kaboni pia huwa ni ya juu sana. Kwa hivyo, hakuna faida zinaweza kufanya wakati gharama ni juu. Sisi hupata hasara.

Ili kuendelea kuwa na faida katika TIST na kwa hivyo kupata mapato mazuri kwa ajili yako mwenyewe na wanakikundi, lazima uhakikishe kuwa kikundi kidogo kinapanda miti ya ziada kila msimu wa kupanda. Sera za TIST zimependekeza miti elfu tano (5,000) na idadi ya kuridhisha ya kupata wanakikundi na viwango vya faida katika suala la mapato ya kaboni na miti mingine ya faida.

Baadhi ya vikundi vilisema kwamba vifo vya miti ni sababu ya kutokuwa na miti mingi. Wakulima

wa TIST wametambua, kupima na wameonelea kuwa kuinua kitalu cha miti husaidia kwa kiasi kikubwa katika kusaidia miche yako kuishi mara moja baada ya kupanda katika shamba lako. Tafadhalii jadili suala hili la vitalu vya miti katika mikutano ya kila wiki, baada ya wiki mbili na pia katika mikutano ya Cluster na mjifunze mawazo zaidi.

## Cluster ya TIST ya Kiriogo: Ni furaha yetu kuyapokea malipo.

**S**isi, Cluster ya TIST ya Kiriogo tunayo furaha kwa kupokea motisha ya miti. Cluster ya Kiriogo iko katika eneo la Laikipia. Tulijiunga na TIST mwaka wa 2008 kwa njia ya TIST Social Entrepreneurship (TSE) juhudi zilizoongozwa na Jinarris Gachoya.

Katika malipo yetu ya mwisho miti, vikundi vidogo ishirini na mbili (22) viliyapokea malipo yao.

**Wajumbe wa Cluster ya TIST ya Kiriogo wakionyesha hati zao za malipo ya miti wakati wa mkutano wao wa Cluster.**

# TIST Kenya Kupokea Wageni Kutoka Taylors of Harrogate, KTDA, na Natural Capital Partners.

**M**namo tarehe Machi 6 na 7, 2017, TIST Kenya ilikuwa na furaha ya kuwapeka wageni kutoka Taylors of Harrogate, KTDA na Natural Capital Partners. Taylors na NCP wanashirikiana na TIST an wakulima wa chai katika viwanda vilivyochanguliwa kusaidia wakulima kupata mapato zaidi kupitia mauzo ya tani ya kaboni pamoja na kuboresha maisha yao. KTDA ni wadau muhimu katika jitihada hizi. Maeneno ya chai maeneo yaliyolengwa na tayari yanafanya shughuli za TIST ni viwanda vya chai vya Kionyo na Imenti Factories Tea katika kaunti ya Meru County na viwanda vya chai vya Makomboki na Ngere katika kaunti ya Murang'a.

Ziara ilikuwa kutoka Taylors Tea: Andy Brown, Mkurugenzi Mkuu wa Taylors Tea, Mary Godfrey na Paulo Cogan wa timu ya ushirikiano ya Wakurugenzi Watendaji, Henry Boocock, mnunuzi chai na Joanne Gray ambaye anasaidia ushirikiano ya Wakurugenzi Watendaji. Mr Kithae Njeru, mkuu wa KTDA Foundation, alijunga na kundi pia. Simon Brown, Mkurugenzi Mtendaji wa Natural Capital Partners alijunga na timu ya TIST ya Ben na Vanessa Henneke, Patricia Wachuka na Kimani Mwangi. Eunice Wambui, Dorothy Naitore na Jeniffer Kithure wa Baraza la Uongozi walijiunga na mikutano siku ya pili ya ziara hiyo.

Katika siku ya Kwanza ya ziara, mnamo Machi tarehe sita, timu ilikutana katika kiwanda cha chai cha Makomboki ambapo walikuwa na vitambulisho vifupi vilivyoongozwa na Meneja wa kitengo cha

kiwanda na naibu wake. Baadaye, timu ya iliendeleza ziara yao ya mashamba. Timu ilitembelea shamba la TIST lililo katika eneo la Kairitu ambapo mkulima mpya wa TIST alikuwa amepanda miti takriban mia moja na ishirini na sita ya miparachichi.

Timu hiyo baadaye ilihudhuria mikutano wa Cluster ya TIST ya Gatiaini. Watu sabini na wawili (72) walionesha nia ya kujunga na TIST pia walihudhuria. Wageni walipata nafasi ya kuingiliana kwa uhuru na wakulima, na kushiriki katika mafunzo ya TIST katika mikutano ya Cluster.

Pia walimtembelea mkulima wa TIST ambaye tayari alikuwa ashajenga kitalu cha kukulia miti na ploti ya Kilimo Hai (*Conservation Farming (CF)*), na baadaye walimtembelea wakulima katika eneo la Kanderendu eneo aliyefanya mazao tisa ya maua, akipewa usaidizi na mradi wa maji unafadhiliwa na Taylors. Maeneo mengine yaliyotembelewa yalikuwa shule ya sekondari ya Kanderendu na kichaka cha TIST kilichokuwa na mizinga kumi na sita ya nyuki na kitalu cha kukulia miti.

Siku ya pili ya ziara ilijojuishakuzuru kiwanda cha chai cha Ngere. Huko kiandani, wageni walichukuliwa kwa vitengo vya usindikaji chai / hatua. Baadaye, kulikuwa na mikutano katika majengo ya Kiwanda ambapo TIST walifanya uwasilishaji. Mlo ulioandalishi uliruhusu kubadilishana na uzalishaji mzuri wa mawazo kati ya wanachama wa Taylors Collaborative CEOs na Baraza la Uongozi lawanachama wa TIST.

## Usafi : Kuosha mikono.

**K**uosha mikono kwa sabuni ni njia moja iliyokatika njia bora na zenyenye gharama nafuu zaidi katika kuzuia magonjwa ya kuhara na nimonia, ambazo pamoja husababisha vifo vyatwatoto wengi katika Kenya.

Mikono mara nyingi hubeba vijidudu kutoka kwa mtu mmoja hadi kwa mwingine, kupitia kuguzana au kupitia kuguza mahali. Watu wanaweza kutambaza bacteria kupitia kuguza mikono, nywele, pua na nyuso za wengine. Mikono ambayo imeguza mavi ya mtu au mnyama, maji ya mwili kama makamasi na vyakula ama maji yaliyochafuka hubeba bacteria, virusi na vijidudu vinavyobeba magonjwa. Kuosha mikono kwa sabuni husaidia kupitia kuhinikiza uambukizaji wa ugonjwa.

Kuosha mikono kwa maji pekee husaidia kidogo kuliko kuosha kwa sabuni kwa upande wa kutoa vidudu. Uoshaji mikono ulio bora ni kwa sabuni na kwa muda wa sekunde nane kufika kumi na tano, kukifua tiliwa na kusuza na maji yanayomwagika.

### **Wakati muhimu sana wa kuosha mikono kwa sabuni**

Zifuatazo ni saa muhimu za kuosha mikono yako:

1. Kabla na baada ya kula vyakula na vitafunio
2. Kabla ya kuwatanza watoto wadogo
3. Baada ya kuguza maeneo ya umma.
4. Kabla na baada ya kutayarisha vyakula, sanasana nyama, kuku au vyakula vya kutoka baharini
5. Baada ya kutumia choo
6. Wakati mikono ni chafu
7. Baada ya kuguza wanyama
8. Wakati wewe au mtu aliye karibu nawe ni mgonjwa

### **Utambuzi wa uoshaji mikono kwa sabuni**

Uoshaji mikono unawezekana kuwa muhimu zaidi wakati watu wanakutana (shulenii, maofisini, makanisani, mikutanoni), ambapo wagonjwa wapo (hospitalini, maskani ya ulezi), mahala chakula kinatayarishiwa na kugawanwa na manyumbani, sanasana walipo watoto wadogo na watu wazima wagonjwa.

### **Kituo cha kuoshea mikono baada ya kwenda choo kilicho rahisi kutengeneza**

Kituo rahisi zaidi ni kuwa ni kuwa na mkebe ulioja maji nje ya choo. Sabuni yapaswa kuwepo. Hata hivyo, njia hii si nzuri sana kwani watu watahitaji kushika kibuyu kabla na baada ya kuosha mikono jambo ambalo bado litasambaza vidudu. Njia badala ya kuosha mikono ni kufanya kituo kama ifuatavyo:

1. Tengeza sura ya mbaa iliyo na msumari katikati wa kushikilia pegi.
2. Tengeza shimo la kuchukua maji machafu kwa kuchimba shimo likizunguka sura na kulijaza mawe. Hili litaruhusu maji kuingia mchangani.
3. Chukua mkebe mkubwa uliofunguka juu (pipa au kibuyu kilichokatwa) na ukijaze maji.
4. Tafuta mkebe mdogo zaidi uliofunguka juu, kama chupa ya maji iliyokatwa.
5. Toboa shimo upande wa chini wa mkebe huu na huongeze mkono wa kuushika.
6. Ingiza mkebe mdogo kwa ule mkubwa ili kuujaza maji.
7. Tundika mkebe mdogo kwa pegi ili maji yaanzie kutoka kidogo kidogo kupitia shimo kama kwa tapu ya maji.
8. Osha mikono yako kwa sabuni.

Ubora wa njia hii ni kuwa unaguza mkebe mdogo mara moja pekee kuujaza maji.

## Kwiana thini wa TIST: Ngwatanio yaku na kikundi ni iendee na kwiana?

TIST Kenya ni iendee na kuthathaa kwa mituki na uvikia isio nzau. Thini wa myaka ina mivituku (kuma 2013), TIST ni ithathaite na kuvika isioni ta sya kaunti ya Masaku (Machakos), Nyamira, Trans-nzoia, Murang'a na oivindani ikuvi thini wa Makueni na Taita Taveta.

Tuithuk ngwatanio imwe ya miao kuma UK yitawa Freshfields, TIST ni iseuvitye kwatanio kauta. Nthini wa Masaku twi Yatta vala vena ngwatanio inya yu ila syivo na ni ngwatanio ya Kakumini, ngwatanio ya TIST Kaluluini, uma vamwe na TIST ngwatanio ya TIST Mamba na ngwatanio ya TIST Ndalani. Nthini wa Myamira twina ngwatanio ya TIST Ekerenyo, ngwatanio ya TIST Etono, ngwatanio ya TIST Gesura, ngwatanio ya TIST Kibirigo, ngwatanio ya TIST Matorola, ngwatanio ya TIST Ratera, ngwatanio ya TIST Sungoiga na ngwatanio ya TIST Ria kimai. Nthini wa Tans-Nzoia twina ngwatanioya TIST Kesogoni, ngwatanio ya TIST Munyaka na ngwatanio ya TIST Kapasa.

Kwisila wiw'anoni witu na Taylors of Harrogate vamwe na International Tea and Coffee buying company nituendee na uthukuma na aimi ma maiani kuma kambunini 4 sya KTDA ila ni: Ngere na Makomboni ila syi kauntini ya Muranga vamwe na Kikonyo na Imenti ila syi kauntini ya Meru.

Woni wa TIST ni kwikia tukundi vinya na memba maasyo vamwe na kuola mathina ala maetetwe ni utemi wa miti, yua na munyao kwa nzia ya kwona nzia ila nzeo ya kuete maendeo ma kwikala ta uvandi wa miti, nima itonyeka, uima wa mwii na liu. TIST ingi nitatite kunengane utethyo

wa ivinda iasa kwa ala me tukundini tunini kwa nzia ya kuta greenhouse gas Credits (GhG).

Kwina kwa kila kakundi nikwavata na niwendi wa TIST kwona kila memba wa kakundi aiketha vaita wa TIST ula utonya utetheesya kwailya mathayu na ukwati wa kila memba. Kwisila nzia ya uvandi wa miti, aimi amwe ma titi nimatungite livoti ya ngwatha nzeo, ukwati onakuvikia kwia kilungu kwimwe kwa ikundi sya kutethania kwa nzia ya kuta miti ya uvanda, ngu, matunda, liu wa indo, uki wa nzuki, wongeleku wa unou wa muthanga na kwaila kwa muthanga kwa kuthambalalia kiw'u.

Kwa nzia ya nima ya kusuvia, aimi nimakusiie wongeleku wa ngetha, uno wa muthanga, uoleku wa muthanga kukuwa, minoo minini ya nima na moseo angi. Uima wa mwii na kisomo iulu wa maluu nutetheesye aingi kwisuviana na mauwau ala maetawe ni kukosekana kwa maluu amwe mwiini. Ingi kwisila kwa maiko ma TIST ma usuvia mwaki uoleku wa ngu na syuki ivinda ya kuua.

### Wianu nthini wa kakundi kenyu?

Kakundi kenyi kanini nikaile kwikala nthi na kusisa mwianite ata kuma mwalika nthini wa TIST. Muvandite miti yiana? nimitiyiana ata ya matunda na ya kiene? Ni aimi meana ata menu matatite nima ya kusuvia (CF)? Ngethat ya nima ya kusuvia na ngetha ila ingi syina kivathukanio? Ni memba meana mena maiko ma usuvia? Ve umwe wenyu utatite kuseuvya kivuo kya kitanda? Wakwata mausungio mailye ata?

Mwina mawalanio mau ma mbua yukite? ni itambya yau ukwosa ya unenge ngwatanio yaku

vaita? Ni miti yiana ata uvangite kwongela kwa kuvanda mbua ino? Wina isio siana ata useuvitye kwondu wa nima ya kusuvia? Mwienda ivuio sya kitanda siana ata na syina mbeu yiana ata kwondu wa mbua ino na ila yukite? Wina mawalanio angi meva? lilikana, kwa kakundi kanini kwithiwa na vaita kwa ene, nimaile uvanda miti mbee wa ngili itano nthini wa myaka itano yambee mamina uklika nthini wa TIST. Ikundi imwe sya TIST iyaaisa uvikia mwoloto woo, onakau mbingi nivikiie.

Kwandaia umbania livoti ya kakundi kaku unengane nthini wumbano wa ngwatatio yenu. Itya utethyo na mawoni kuma tukundini tungi kwailya Walanio wa meko menu mena woni (**Action plan for growth with goals**) (**Conditions of satisfaction - COS**).

#### Vena Kwiana nthini wa ngwatatio yenu?

Nthini wa wumbano wa ngwatatio yenu kunikilai kwiana kwenyu. Ni miti yiana ata ila ngwatatio yenu yinayo? mwina tukundi twiana tuandikithye?

Mwina miti yiana ata ila muvandite kila mwaka? Mwina isio siana ata sya nima ya kusuvia ila muneekie mbua thelu na mukwika mbua ino?

Mwina aimi meana ata mekwika nima ya kusuvia, uki wa nzuki, kuvanda miti nguumoni sya

mbusi, kuvanda miti ya matunda, maiko ma usuvia mwaki, ivuio sya kitanda?

Mwina mwoloto mwau wa mwaka uyu? ni miti yiana ata mukwongela, nima ya kusuvia, maiko ma usuvia mwaki, ivuio sya kitanda, miti ya matunda na ya kiene? Mwina mwoloto ingi mwau mwinaw'o?

Thini wa uthiani, ni tukundi twiana ata tunavitukithi'e nthini wa myai 18 mithelu? mwina mivango myau kutuma kila kakundi kavitukith'a nthini wa mya 18?

Nthini wa ndivi ya tukundi tunini, ni ikundi siana ata iokwatite ndivi ya Uthuthio? na niikundi siana mbitukithye kukwata ndivi ya uthuthio nundu wa uvikia miti 500, nimeekiie saii wiw'ano wa GhG na ni avituukithye nthini wa myai 18? na nimena mateavitukithye? kutumi kya ulea uvitukith'a nikyau? Mwiika atana kumatethya na kumathuthya ala mateavitukithye? Mwina miao yiva ya kwaniwa na kuvikia mwoloto nthini wa ndivi ya tukundi?

Atongoi ma ngwatatio mekulw'a kuthukuma vamwe na athukumi ma ngwatatio kuseuvya livoti na **Itambya ya kwika kuvikia kwiana na mwoloto (Conditions of satisfaction - COS)** na kumaente nthini wa wumbano wukite wa ngwatation na kutuma nthini wa GOCC na utongoi wa kanzu.

## Utethyo ukwendeka, Mukwatilia wa Utongoi wa kanzu ya TIST.

**U**tongoi wa kanzu ya TIST Kenya nuumatha mundu waile kutetheesa nthini wa timu ya utongoi wa LC kwa kuandika livoti, kuandika notes, kuandika mawoni iulu wa soko and wia ula ungi wanewa ni LC.

Ethiwa wina utuika na wina wendi wa uthukuma na aimi kwailya mawithyluluko, wi

musomu computer na wina utuika wa utumia internet, email na wina kisungu kiseo kiandike na kya uneena, niwendete uthukuma na andu na wimuseo kwa uandika kila kyaneenwa, kutunga livoti, kuandika mawoni, kwandia tuma valua wa ukulya wia vamwe na CV kwi Eunice Wambui kwa Email ino:- mbee wa matuku 30/04/2017.

## TIST: Niki kakundi kaku kethiwe na kena miti mbee wa 500 nikana kavikie ndivi.

**T**ukundi twangi nitwithiitwe tuikulya niki tuteukwata ndivi na meba miti itavikite 500.

Kwambiia, ndivi ino inenganawe mbee wa nzeve itavisaa itanambiia kutewa. Ni viasala, nthini wa viasala andu mathukumaa na kithito kukwata vaita. Kwa viasala w'oonthe kukwata vaita utumiku waile ikala withi na utandithya wi yiulu.

Youla kakundi kena miti minini utumiku wa kuvitukithya withiawa iugu kwa kila muti. Na kwoou utumiku wa kuiza uyithia wi yiulu.

Ingi utumiku wa kuthiana, kukunikila na kuvitukithya kwa kila tani withiawa iulu. kwoou uyithia vaina vaita yila utumiku wi iulu na kwiiu tukwata wasyo.

Nikana wikale wina vaita nthini wa TISTna kukwata vaita kwa kakundi kaku, niwaile ikiithya kana kakundi kaku nikavanda miti ingi mbua ino. Walanio wa TIST wendethasya miti ngili itano kwa kila kakundi nikana withie nikavikia ukwata vaita wa nzeve itavisaa na vaita ingi sya miti.

Tukundi tumwe nitwithiitwe tuiteta kana miti kuma ni kitumi kimwe kyoo kya kwithiwa matena miti italika. Aimi ma TIST nimasakuite, makathima

na kuikiithya kana kivuio kya kitanda niketetheesye vanen kwa kwithiwa miti itonya kumiisya itina wa kuvandwa miundani. Kwandaia neenanisyai iulu wa nzia sya useuvya kivuio nthini wa wumbano wenyu wa kila mwai na ingi nthini wa wumbano wenyu wa ngwatatio kuete mawoni kivathukario.

## Ngwatatio ya TIST Kiriogo: Ithyi twina utanu kukwata ndivi.

**I**thy, ngwatatio ya TIST Kiriogo twina utanu nundu wa ukwata ndivi ya miti, Ngwatatio ya TIST ya Kiriogo yithiawa nthini wa kisio kya Laikipia. Nitwalikile nthini wa tist mwaka wa 2008 kwisila kwa TIST Social Enterpreneurship (TSE) kwa uthuthio wa Jkinarris Gachoya.

Nthini wa ndivi ila tunakwatie tukundi miongo ili na twili (22) nitunakwatie ndivi yatwo.

**Ngwatatio ya TIST Kiriogo: Ithyi twina utanu kukwata ndivi.**

# TIST Kenya kukwata aeni kuma Taylors of Harrogate, KTDA na Natural Capital Partners.

**M**wai wa katatu matuku 6 na 7 2017 TIST Kenya maina utanu kuthokewa ni aeni kuma Taylors Harrogate, KTDA na Natural Capital Partners. Taylors na Naturakl Capital Partners. Taylors na NCP nimeuthukuma vamwe na TIST na Aimi ma Maiani ma kyai kuma isioni ila syina kambuni sysa uthia maiani na kutetheesya aimi aya kwithiwa na ukwati kwa kuta tani sysa carbon (nzeve itavisa) na kwailya mikilile yoo. KTDA niikwete mbau walario uyu. Isio sysa maiani ila sylekelwe na syambiie uthukumana na TIST ni Kionyo na lmenti kuma Meru Kaunti na Makomboki na Ngere kuma Murang'a.

Ndembea ino yaina andu kuma Taylors Tea ala ni: Andy Bown Managing Director of Taylors Tea, Mary Godfrey na Paul Cogan ala ni timu ya CEO, Henry Boocock muui wa maiani na Joanne Gray ula ukukwata mbau ngwatatio ya ma CEA. Mr. Kithae Njeru ul;a ni munene wa KTDA Foundation niwalikanile na kikundi kii. Simon Brown managing Director Natural Capital Partners niwalikanile na timu ya TIST ila yaina Ben na Vanessa Henneke, Patricia Wachuka na Kimani Mwangi, Eunice Wambui, Dorothy Naitore na Jeniffer Kithure wa utongoi wa Kanzu ya TIST nimalikanile na kikundi kii muthenya wakeli.

Muthenya wambee matuku 6/3/2017 nimakomanie na timu kuma kithii kya mainani kya Makomboki na veethiwa na kwiyielesya kula

kwatongoew'e ni Factory Unit Manager na Vice Chairman of the Factory. Itina wa uu nimaendie utembea miundani. Timu ino niyatemebeie muundani wa TIST wa Kairitu vala vena muimi mweu wa TIST uvandite ikolovea ivika 126.

Timu ino iyasyokie yathi ngwatatio ya TIST ya Gatiaini , vala andu 72 eu maina wendi wa kulika nthini wa TIST. Aeni nimeethiiwe na ivuso ya kuneenania umwe kwa ungi na aimi na ala mookite umanyiw'a ni TIST nthini wa wumbano wa ngwatatio.

Nimasyokie mavika kwa muimi ungi wa TIST ula wina Kivuo kya kitanda na wina kaploti wikite nima ya kusuvia(CF), nimasyokie mathi ingi kwa muimi wi kisioni kya Kanderendu ula wina mithemba 9 ya horticulture crops utumiite kiw'u kiiviwe ni Taylors. Kungi mavikie ni ta sukulu kwa sekondali wa Kanderendu and mitibni ingi ya TIST ila yina kivuo kya kitanda na myatu 16.

Muthenya wakeli ni matembeie kisioni kya kithii kya maiani kya Ngere.Aeni aa nimatebeiw'e kithiini kii na kwonw'a undu maiani mathiawa itambya kuthi yila yingi. Itina nimeethiiwe na wumbano ovau kithiini vala TIST moonanisy e utuika woo. Nimeethiiwe na ivinda ya kyauya kya muthenya na matonya uneenanina na kuvinduana mawoni na amemba ma Taylors Collaborative CEA na amemba na atongoi ma Kanzu ya TIST.

## Utheu na Kuthesya: Kuthamba Moko.

**K**uthamba moko na savuni ni nzia imwe itethiawa na ngalama ya kusiia uwau wa kwituua na kyambo ila ni imwe kati wa mowau ala moaa syana thini wa nthi ya Kenya.

Moko kaingi nimo tusamu kana germs ila ietae uwau syisilaa kuma munduni umwe kuthi ula ungi kana kuma vandu mundu weekwatila. Andu ni unyaiiika bacteria kwa kukwata kw'oko kwa mundu ungi kana swii, iny'uu kana uthyu. Moko ala makwata mai ma mundu kana nyamu, kiw'u kuma mwiini ta kimia ni uthokoany'a liu kana kiw'u kila kitonya uwasya andu angi. Kuthamba moko na savuni nikusuviaa kunyaiiika kwa bacteria kana tusamu tula tuetae uwau munduni.

Kuthamba moko vate savuni kunyumasaya bacteria kana virus syothe mokoni, indi wathamba na savuni vandu va sekondi ta 15 na kwithambukya nikuyetaa tusamu tuu.

### Ivinda yavata ya kuthamba moko na savuni.

1. Mbee na itina wa kuya liu kana matunda
2. Mbee wa kukwata mwana
3. Itina wa kwikwatila vandu vatumiawa ni andu aingi
4. mbee na itina wa kuseuvya liu munamuno nyama, nguku kana makuyu
5. Itina wa kutumia kyoo
6. Yila moko mena kiko
7. Itina wa ukwata nyamu
8. Yila we kana umwe wenyu ni muwau.

### Kumanya na kumanyithany'a iulu wa kuthamba moko na savuni.

Kuthamba moko kaingi nikwaile vala andu aingi makomaniaa ta sukulu, kanisa, mbumbano, Vala andu awau kana matonya ukwatwa ni uwau kwa mituki mai ta masivitali vala liu ukuuwa na kuawa na misyini munamuno vala ve syana nini na andu aimaa mii yo itena vinya wa kukita mowau.

Vandu vaseuvitwe va kuthambia moko itina wa utumia kyoo kwa ngalama ninini

Nzia ila yi laisi yvu nikwosa katoma kwikia kiw'u na kwia nza wa kyoo vamwe na savuni. Onakau nzia ino ti nzeo nundu mundu nonginya akwate katoma kaa mbee wa kuthamba na itina undu ula utonya utuma germs iendeea na kunyaiiika. Kindu kya uthamba moko niktonya useuvya uyu

1. Seuvya vulemu ya uvwau yina musumaa kati ta kikuli.
2. Seuvya iima ya ulika kiw'u kula kyathamba moko na yiima yiu uyususya mavia nikana kiw'u kilike muthangani
3. Mantha itoma yime ikunue kana utile katoma na uyususya kiw'u.
4. Mantha suva munini uu na utila
5. Seuvya iima inini yila itomani vaaya ungu na yuukia kwoko
6. Inda ula suva yila itomani yikiw'u wusue
7. Isilya ula suva kila kikulini withie kiw'u kyambiia uma ta muvelekini
8. Thamba moko na savuni

Useo umwe wa nzia ino ni kana ukwataa kasuva kaa katue oimwe yila ukwikia kiw'u.
