TIST NEWSLETTER NOVEMBER 2019

Cluster meeting in Nyandongo Katerera -Bushenyi

TIST Uganda Staff in Amuru District with district official for a one day meeting

Small group seed bed ready for transplanting and potting

The TREE is a monthly newsletter Published by TIST Uganda, a project area of **The International Small Group and Tree Planting Program**.

MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

ADDRESS:

*TIST Uganda.

- SPACING AND AREAS TO PLANT FRUIT TREES
- TIST TRAININGS ARE OF BENEFIT TO US
- TIST PROGRAM HAS HELPED US LEARN ALOT
- TIST AGROFORESTRY FIELD STUDY CENTER
- TREES AS BUSINESS AND WHY WE SHOULD PLANT MORE TREES

ENGLISH

SPACING AND AREAS TO PLANT FRUIT TREES

Eligible tree groves should have trees planted at a good space of minimum of 2meters, or 6feet, for wood and timber trees.

For fruits trees, we recommend 5 meters, or 15 feet, from one tree to another. Fruits trees can be grown in the main gardens of bananas and pineapples, because some crops add soil fertility and some control soil erosion.

You can also plant trees along the paths, road and streets to make our environment look good.

Plant trees on bare hills and do not encroach wetlands with trees which are not friendly, because they affect the environment.

By Atuhaire Prudence

TIST TRAININGS ARE OF BENEFIT TO US

TIST is the program that provides training to people from different denominations. It has created unity among them and is making us even communicate in different languages.

Through the trainings, we are able to get good leaders, since leadership is rotational.

It also provided room for touring different regions that they never visited before.

TIST equips people with skills and knowledge in doing various TIST programs.

By Okello Joseph

TIST PROGRAM HAS HELPED US LEARN ALOT

TIST program will help you to move you from one stage to another. When you join it, you can form a Small Group of 6-12 members, from about three families. You can invite a Cluster Servant from a nearby Cluster to guide you and teach you. You will learn the TIST best practices and values in your Small Group.

Through TIST training, you can work as a volunteer and in a few months, you become a trainer.

After mastering mobilization, sensitization, group formation and guiding quantifiers in the field as a trainer, you learn a lot and are offered a chance to apply and work as a Cluster Servant and in a few months, you will start earning money from those trees. You will learn Conservation Farming and making energy saving cook stoves. You can learn how to start table banking in your group.

You will join other groups to form a bigger group called a Cluster and in there you will learn how to become a leader and many other things. Join today! Don't be left blind.

By Kiromba Wilber

TIST AGROFORESTRY FIELD STUDY CENTER

Since the inception of TIST in Rukungiri district, the mission and vision of TIST was demonstrated in our Small Group called Rushaya Valley Afforestation, in Rushaya B cell, in Bwambara Parish.

It looks attractive and imperative to be named "TIST agroforestry conservation field study centers", in the future, to reflect the image of nature on the globe.

It is comprised of diverse of tree species, shrubs and herbs, which portrays it as a living laboratory.

African eagles have chosen to set nests on the canopy of some indigenous tree species that are conducive for eagles to hatch young ones. It is adjacent to Queen Elizabeth National park, a renowned home of climbing lions.

By Jackson Katarikawe-Cluster leader –Bwamabara Cluster

TREES AS BUSINESS AND WHY WE SHOULD PLANT MORE TREES

Despite the work involved in clearing the land and caring for the trees, trees can act as bank because it is the best investment and an insurance where we can get income and be able to sustain ourselves, and also pay school fees for our children. Tree planting programs like TIST program in Uganda have been started to allow tree planters to benefit from carbon credits.

Trees are also essential to life because they create the very air we breathe and filter air pollution.

Most importantly, trees sequester carbon, helping to remove carbon dioxide and other greenhouse gases from the air, which cools the earth.

Uganda has two main rainy seasons during the year, and this means that we are blessed; we can plant trees all the year. Ugandans – let us embrace the TIST program and plant trees for business and also protect our environment from air pollution.

KUWEKA NA MAENEO YA KUPANDA

MTI YA MATUNDA

Misitu inayofaa ya mti inapaswa kuwa na mti iliyopandwa katika nafasi nzuri ya chini ya mita 2, au miguu 6, kwa mti ya mti na mbao. Kwa mti ya matunda, tunapendekeza mita 5, au futi 15, kutoka mti mmoja hadi mwingine. Mti ya matunda inaweza kupandwa katika bustani kuu za ndizi na mananasi, kwa sababu mazao mengine yanaongeza rutuba ya mchanga na udhibiti fulani wa mmomonyoko wa ardhi. Unaweza pia kupanda mti kando ya njia, barabara na mitaa ili kufanya mazingira yetu ione-kane nzuri.

Panda mti kwenye vilima visivyowekwa wazi na usiingie kwenye maeneo yenye mvua na mti ambayo sio rafiki, kwa sababu inaathiri mazingira.

Na Atuhaire Prudence

MAFUNZO YA TIST NI YA FAIDA KWA SISI

TIST ndio mpango ambao hutoa mafunzo kwa watu kutoka kwa dhehebu tofauti. Imeunda umoja kati yao na inatufanya hata tuwasiliane kwa lugha tofauti.

Kupitia mafunzo hayo, tunaweza kupata viongozi wazuri, kwa kuwa uongozi ni mzunguko. Pia ilitoa nafasi ya kutembelea mikoa tofauti ambayo hawajawahi kutembelea hapo awali. TIST inawapa watu vifaa stadi na maarifa katika kufanya mpango kadhaa za TIST.

Na Okello Joseph

MPANGO YA TIST YIME TUSAIDIA NA KUTUFUNDISHA MENGI

Mpango ya TIST itakusaidia kukusogeza kutoka hatua moja kwenda nyingine. Unapojiunga, unaweza kuunda Kundi ndogo la washiriki 6-12, kutoka familia kama tatu. Unaweza kumkaribisha Mtumishi wa nguzo kutoka kwenye nguzo la karibu kukuongoza na kukufundisha. Utajifunza mazoea na maadili bora ya TIST katika Kikundi chako Kidogo. Kupitia mafunzo ya TIST, unaweza kufanya kazi kama kujitolea na kwa miezi michache, unakuwa mkufunzi.

Baada ya kusimamia uhamasishaji, uhamasishaji, malezi ya vikundi na waongozaji kwenye uwanja kama mkufunzi, unajifunza mengi na hupewa nafasi ya kuomba na kufanya kazi kama Mtumishi wa Kikundi na katika miezi michache, utanza kupata pesa kutoka kwa miti hiyo. Utajifunza Ukulima wa Uhifadhi na kutengeneza majiko ya kupika ya kuokoa nishati. Unaweza kujifunza jinsi ya kuanza kuweka benki katika kikundi chako. Utajiunga na vikundi vingine kuunda kundi kubwa linaloitwa nguzo na huko utajifunza jinsi ya kuwa kiongozi na mambo mengine mengi. Jiunge na leo! Usiachwe upofu.

Na Kiromba Wilber

KITUO CHA KUJIFUNZAUPANDA JI WA MTI KWA MPAGO YA TIST.

Tangu kuanzishwa kwa TIST wilayani Rukungiri, utume na maono ya TIST yalionyeshwa katika kikundi chetu kidogo kinachoitwa Rushaya Bonde la Msitu, katika kiini cha Rushaya B, katika Parokia ya Bwambara. Inaonekana kuvutia na ya muhimu kutajwa kama "vituo vya utunzaji wa shamba la utunzaji wa TIST", katika siku zijazo, kuonyesha sura ya asili kwenye ulimwengu. Ni pamoja na anuwai ya miti, vichaka na mimea, ambayo huonyesha kama maabara hai. Tai wa Kiafrika wamechagua kuweka viota kwenye dari ya aina za miti asilia ambazo zinafaa kwa tai kuwachimba vijana. Iko karibu na Hifadhi ya Malkia Elizabeth National, nyumba mashuhuri ya simba ya kupanda simba.

Na Jackson Katarikawe-Kiongozi wa nguzo Bwamabara Nguzo
