on their Nursery bed

Cluster Servant conducting cluster meeting in Buyobe-Bukujju Cluster in Kayunga

The **TREE** is a monthly newsletter Published by TIST Uganda, a project area of The International Small Group and Tree Planting Program.

MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges

ADDRESS:

TIST Uganda
 Bushenyi Town, Liberation Road - Kitoky Lane

I AM HAPPY FOR TIST PROGRAM

My name is Obote Christopher and I am a TIST farmer from Gulu. I joined TIST in December 2016 when it was introduced here in Gulu, through sensitization seminars organized in Gulu.

I was worried if TIST was for real and would pay for my trees that I planted when I joined the program. When my trees got quantified, I signed the contract with TIST program and agreed to not harvest my trees until they grow up 30 years. When the contract was signed I immediately received payments out of my trees which helped me take care of my grove. I therefore encourage other TIST farmers to continue planting trees for TIST program. By planting trees, it will bring change to the world and God will reward you more.

By Obote Christopher a farmer from Gulu District.

I LOVE TIST BECAUSE IT IS EDUCATIVE

My name is Okello Francis from Gulu and I joined TIST program in October 2017 in training and sensitization seminars in Gulu.

I joined TIST with an intention to get tree incentives but later realized many benefits from the program apart from tree planting. I was able to learn about energy saving cook stoves, planting fruit trees, practicing conservation farming and also conserving environment in general. Because of joining TIST program I now know how to plant teak trees.

STEPS FOR RAISING AND PLANTING TEAK TREES

- Collect mature trees from the mother tree
- Soak the seeds in water and leave it in water for 2 weeks as you check on the germinating rate.
- When the seeds start germinating, transfer them to the seed bed immediately.
- Check if the seeds are starting to bring 3 leaves and above.
- If the seedlings are shooting well with 3-4 leaves in the seedbed, transfer them to your groves to be planted.

By Okello Francis – Cluster servant Gulu District

Cluster –Lokome, Group-Yagopino Farmers A

HOW CAN YOU KNOW THAT YOU HAVE

BEEN A GOOD LEADER

- Be able to know the total number of new recruited and registered Small Groups.
- Be able to know total number of live trees planted.
- Total number of groves quantified.
- Total number of new Clusters formed.
- Monthly, weekly reportings.
- Be able to improve community livelihood (rolemodel).
- Be able to know Small Groups that have received incentives and ones that haven't, so that you can help.
- Partnership with other stakeholders like local leaders.
- People testifying about the benefits of the program
- Gender balancing and equality during meeting and other leadership roles.

By Joseph Saviour Eturot Quantifier

(A Trainer and a Farmer TIST Soroti.)

NEWS ABOUT TIST'S PROFIT SHARING

Dear TIST Participants,
Last month we were able to announce that TIST had made a profit on its carbon sales, and CAAC would be paying the 70% profit sharing to the eligible farmers. This month we are going to be working on developing the specific policies necessary for implementing that payment.

A reminder. The 'tree payments' that have been made to the Small Groups since TIST began in Kenya are "advances" or "pre-payments" on the Small Groups carbon income. So, a Small Group will have these profit payments first applied to the catch up on the advances already paid.

The good news is that this approach will mean that over time all of the Small Groups will be receive the same amount of carbon payments per tonne of their Verified carbon reductions - it won't matter whether your Small Group had times when it did not get paid the advances.

For instance, we will be working to develop policies and plans to make the payment fair, transparent, and timely. For instance, if any Small Groups have "bushy groves" or groves that are far from the rest of the Small Group, and those groves have not been Quantified in 5 years, those groves do not count for the Verifications. If a member of the Small Group has 'clear cut' their grove, or has quit TIST, or is not maintaining the 'forest' as agreed, those tonnes will also not count. When a Small Group 'loses' some of their tonnes for those reasons, they may not be eligible to receive the 70% share of the profits because their actions have reduced the tonnes produced and sold by TIST. The TIST UG Staff, the Cluster Servants and the Cluster Leaders will work to develop ways to make sure that each Small Group is treated fairly.

In March we will also have a meeting of all the Uganda Cluster Servants, and develop the specific plans that will implement the information gathering necessary and to catch up on all Quantifications necessary.

Your Cluster Servants will be well informed and will be able to answer your questions at Cluster Meetings. Moreover we will inform you through this newsletter of the implementation plan, and also the "Frequently Asked Questions" about the profit sharing.

Let's work together to make this process fair and to run smoothly!

KISWAHILI

NINAFURAHIA MPANGO WA TIST.

Jina langu ni Obote Christopher na mimi ni mulimaji wa TIST kutoka Gulu. Nilijiunaa TIST mwezi Desemba 2016 wakati ilianzishwa hapa Gulu, kwa njia ya semina za uhamasishaji iliyoandaliwa huko Gulu. Nilikuwa na wasiwasi ikiwa TIST ilikuwa ya kweli na ingeweza kulipa miti yangu niliyopanda wakati nilijiunga na programu hiyo. Wakati miti yangu ilipimwa, nilisaini mkataba na mpango wa TIST na nimekubaliana kuvuna miti yangu mpaka kukua miaka 30. Wakati mkataba uliposainiwa mara moja nilipokea malipo kutoka kwa miti yangu ambayo imenisaidia kutunza shamba langu. Kwa hiyo, ninahimiza wakulima wengine wa TIST kuendelea kuendelea kupanda miti kwa mpango wa TIST. Kwa kupanda mimea, italeta mabadiliko kwa ulimwengu na Mungu atakupa thawabu zaidi.

Na Obote christopher mulimaji kutokea Gulu.

NINA HI PENDA TIST KWA SABABU INAFUNZA

Jina langu ni Okello Francis kutoka Gulu na mimi nilijiunga na mpango wa TIST Oktoba 2017 katika semina za mafunzo na uhamasishaji huko Gulu. Nilijiunga na TIST kwa nia ya kupata msukumo wa miti lakini baadaye nilifahamu faida nyingi kutoka kwa programu bila ya kupanda miti. Niliweza kujifunza juu ya vituo vya kupika vyenye nishati, kupanda mimea ya matunda, kilimo cha mazoezi ya uhifadhi na pia kuhifadhi mazingira kwa ujumla. Kwa sababu ya kujiunga na mpango wa TIST sasa ninajua jinsi ya kupanda miti ya teak.

HATUA ZA KUZALISHA NA KUPANDA MTII ZA TEAK

- Kusanya miti ya kukomaa kutoka kwa mti wa mama
- Weka mbegu katika maji na kuacha maji kwa wiki 2 unapoangalia kiwango cha kuota.

- Wakati mbegu zinapoanza kuota, uwapeleke kwenye kitanda cha mbegu mara moja.
- Angalia kama mbegu zinaanza kuleta majani 3 na hapo juu.
- Kama miche inapigwa vizuri na majani 3-4 kwenye mbegu, uwapeleke kwenye mashamba yako ya kupandwa.

Na Okello Francis-mtumishi wa Wilaya ya Gulu Cluster -Lokome, Group-Yagopino wakulima A

JE, UNaweza kujua kwamba ume kuwa muongozi mzuri

- Kuwa na uwezo wa kujua idadi ya vikundi vidogo vilivyoajiriwa na vilivyosajiliwa.
- Kuwa na uwezo wa kujua idadi kamili ya miti iliyopandwa.
- Jumla ya idadi ya miti imethibitishwa.
- Jumla ya idadi ya Clusters mpya.
- Taarifa za kila mwezi, kila wiki.
- Kuwa na uwezo wa kuboresha maisha ya jamii (mfano wa mfano).
- Kuwa na uwezo wa kujua Vikundi vidogo vilivyopokea motisha na ambazo hazipo, ili uweze kusaidia.
- Ushirikiano na wadau wengine kama viongozi wa mitaa.
- Watu wakihubiri kuhusu faida za programu
- Kusanisha jinsia na usawa wakati wa mkutano na majukumu mengine ya uongozi.

Kwa Mwokozi wa Joseph Eturot Quantifier- Mkufunzi na Mkulima TIST Soroti.

HABARI KUHUSU FAIDA YA TIST. Wapenzi TIST Washiriki,

Mwezi uliopita tuliweza kutangaza kuwa TIST ilifanya faida kwa mauzo ya kaboni, na CAAC ingalipa malipo ya faida ya 70% kwa wakulima wanaostahili. Mwezi huu tutafanya kazi katika kuendeleza sera maalum zinazohitajika kwa kutekeleza malipo hayo. Mkumbusho. 'Malipo ya mti' ambayo yamefanywa kwa vikundi vidogo tangu TIST ilianza Kenya ni "maendeleo" au "kabla ya malipo" kwenye kipato cha kipato cha kabila ndogo. Kwa hiyo, Kikundi Kikubwa kitakuwa na malipo haya ya faida kwa mara ya kwanza kutumika kwa kukamata juu ya maendeleo yaliyopwa tayari.

Habari njema ni kwamba njia hii itamaanisha kwamba baada ya muda Vikundi Vidogo vidogo vilipata kiasi sawa cha malipo ya kaboni kwa tani ya kupunguza vyeti vya kaboni - haijalishi kama kundi lako ndogo lina wakati ambapo halikupata kulipwa maendeleo.

Kwa mfano, tutafanya kazi ili kuendeleza sera na mipango ya kufanya malipo ya haki, ya uwazi, na wakati. Kwa mfano, kama vikundi vidogo vidogo vimekuwa na "milima ya bunduki" au milima ambayo iko mbali na Kundi Lilache ndogo, na mashamba hayo haijatambuliwa katika kipindi cha miaka mitano, milima hiyo haifai kwa Vyeti. Ikiwa mwanachama wa Kikundi Kikubwa ana 'kukata wazi' shamba lao, au amekataa TIST, au haifai 'msitu' kama ilivyokubalika, tani hizo pia hazitahesabu. Wakati Kikundi Kikubwa 'kinapoteza' baadhi ya tani zao kwa sababu hizo, haziwezi kustahili kupokea sehemu ya asilimia 70 ya faida kwa sababu matendo yao yamepunguza tani zinazozalishwa na kuuzwa na TIST. Wafanyakazi wa TIST, Watumishi wa Cluster na Viongozi wa Cluster watafanya kazi ili kuendeleza njia za kuhakikisha kwamba kila kikundi kidogo kinachukuliwa kwa haki.

Mnamo Machi tutakuwa na mkutano wa watumishi wote wa Cluster Uganda, na kuendeleza mipangilio maalum ambayo itatekeleza mkusanyiko wa habari muhimu na kukamata juu ya yote Quantifications ni muhimu. Watumishi wako wa Cluster wataelewa vizuri na wataweza kujibu maswali yako kwenye Mkutano wa Makundi. Aidha tutawaambieni kupitia jarida hili la mpango wa utekelezaji, na pia "Maswali Yanayoulizwa Mara kwa mara" kuhusu kushirikiana kwa faida.

Hebu tufanye kazi pamoja ili kufanya mchakato huu usawa na kuendesha vizuri!

*Na Ben Henneke
Mwanzilishi wa TIST*

KWANE I KOM POKO MUGOBA PA TIST

I dwe ma okato ni watito ni TIST onongo mugoba I cato carbon ne, dok ni CAAC obiculo pacent 70 me mugoba ni bot lupur ma yadi gi dong dongo, dok ma guco ne/ dwe man wabibedo ka neon yoo mene mamite dok maber me culu cul meno Lapur wi, cente magiculo pi pito yadi, ma lupur I dul matino obedo ka nongo ne ne nicake ma wiye atii I bud cente me carbon maomyero dul matino gunong. Pi man, dul matino ma pe gunongo cul gi bimedo cente ge meno weng I kom centre me carbon Kwena maber tye ni dul mtino binongo cente ducu ma onongo omyero gunong , ka onongo pe giculu gi cul me wi atii caa Labol le, wabitiyo me neon ni cul obedo I yo ma atir, kaka maleng dok I kare ne kikome. Ka dul matidi tye ki poto yadi ma odin ki poto yadi maboo ki kom pa

lumemba me dul mukene ni dok pe gikwano pi mwaka 5 ci pe twero nongo cente me carbon, pien pe gilworo ngiyo ka gitye onyo peke. Ka lupur I dul matidi otongo yadi ne woko weng , onyo oa oweko TIST woko, onyo pet yr ka gwoko poto yadi ne kit ma onongo giwinye iye, carbon pe nongo cente me carbon
Ka lapur I dul matino girwenyo nongo cente me carbon, pioen tic gi odwoko well tones me carbon
piny
Lutic pa TIST I Uganda, lutic pa dul madito ki lutela me dul madtito gibiyubo yoo me cul ma bibedo atir bot dul matino ducu
I dwe me 3 ki bene wabibedo ki kacoke pa lutic pa dul madito ducu ma I Uganda ci waneno yoo me nongo ngec ma mite I kwano yadi. Lutic me dul madito meg wu bineno ngec dok bigamo lapeny mo keken ki bot wu I kacoke pa dul madit. Wabitityo bene ki karatac me lok angeya pa TIST me mini wu ngec I kom peny ma gimaro peny gi tutwal I kom kit me cul cente me carbon. Watiyo kacelo me waweko tic man owot kakare dok I yoo ma atir

Man Ben Henneke ma en Ngat ma Ocaho TIST
